## **State Statistics Service of Ukraine**

Responsible for the edition: **I. SENYK**

The "Women and Men in Ukraine" publication was prepared on the basis of state statistical surveys data and administrative data, materials of sampling surveys, and Eurostat data. The publication was compiled by specialists of the Department of Social Statistics with use of materials from branch departments of the State Statistics Service.

Information for users: in the publication, the data for 2014-2020 are given excluding the temporarily occupied territory of the Autonomous Republic of Crimea, the city of Sevastopol and a part of temporarily occupied territories in the Donetsk and Luhansk regions (except tabl. 1.10-1.13).

When using the data and materials contained in this statistical publication "Women and Men in Ukraine" you are required to make reference to the original source.

This publication has been translated with the support of the Project "Gender Budgeting in Ukraine". Project is carried out for the support purposes of the Ministry of Finance of Ukraine in course of implementation of the gender responsive budgeting in Ukraine and is financially supported by Sweden.

## Foreword

Ensuring equality of women and men in all areas of society's activity is one of important conditions for realization of human rights self-fulfillment of the individual, the establishment of democracy, the key to solving socio-economic problems, and a part of Ukraine's European integration.

Ensuring equality between women and men is an integral part of human progress, an element of democracy and an important condition for building a state governed by the rule of law. Only under rule of law, when not only equal rights are actually provided, but also equal opportunities for their realization, the principle of equality is affirmed.

Issues of gender equality, justice and women's empowerment are increasingly recognized as paramount to the sustainable development process. Gender issues are not limited to identifying specific problems, but are considered as basic principles in the development of appropriate line of policy, planning and selection of strategic directions.

Assessing the effectiveness of the implementation of the mechanism for ensuring equal rights and opportunities for women and men in all spheres of society and the implementation of European equality standards requires appropriate information support. Expanding the list of indicators disaggregated by gender in accordance with international standards is one of the tools for monitoring gender equality.

The statistical publication "Women and Men in Ukraine" is another publication of the State Statistics Service, in which information is presented through the gender aspect.

The publication was prepared on the basis of state statistical surveys data and administrative data, materials of sampling surveys, and Eurostat data.

Data on the population, level of education, health care, distribution of the population by economic activity, unemployment rate, employment by sectors of economy, average monthly wages, and crime are presented according to the gender aspect.

The publication includes gender statistics in the regional context and international comparisons of individual indices of population and employment statistics with the European Union countries.

We hope the publication will be useful to experts and scholars on gender issues in various fields of knowledge, as well as of interest to public and foreign users of information about the current situation of women and men in Ukraine.
